

I have been a subscriber to XM Radio for 3 months now and have found the local programing, weather and trafic in particular, to be extremely helpful. if the local programers would offer a service that kept me up to date on local weather and trafic as effectively as XM Satalite radio, I would listen to them instead. As it is, they donnot. So, unless there is are legal ground to challenge this local content on Satalite radio, i see little validity in the complaints of the NAB. I would ask that you take only the legal aspects of this case into consideration.
